Summary

Undergraduate Computer Science & Engineering student at MLR Institute of Technology with hands-on experience in full-stack development. Proficient in Python, Java, JavaScript, React.js, and REST API design. Completed a virtual internship at Infosys Springboard applying data structures, web development, and clean coding practices.

Work Experience

Infosys Springboard

Feb 2026 - Apr 2026

Full Stack Developer Intern

India

Completed a virtual Infosys Springboard internship focused on full-stack development, data structures, and industry-oriented problem solving through structured, project-based learning.

- Completed structured modules on object-oriented programming and core data structures, applying concepts in implementation-focused labs.
- Developed and tested algorithms in C++ and built REST APIs to practice clean coding, modular design, and version control workflows.
- Strengthened debugging, unit testing, and code review skills while implementing complex data-structure-based features.
- Delivered internship milestones on schedule by collaborating in a guided virtual team environment with defined tasks and deadlines.

Projects

AgroSmart – Smart Crop Advisory and Disease Detection System | [GitHub – AgroSmart](#)

- Built a Flask-based web application providing smart crop advisory and disease detection for farmers.
- Implemented user registration, authentication, and farmer profiles with persistent history using SQLite (SQLAlchemy).
- Developed crop recommendation module with RandomForest ML hook and robust fallback logic for reliability.
- Created fertilizer recommendation with history tracking and nutrient status charts to support data-driven decisions.
- Integrated leaf disease detection flow with CNN/Keras hook and REST APIs for crop, fertilizer, and disease workflows.

Librario – Library Management System | [GitHub – Librario](#)

- Built a full-stack library management system with Spring Boot backend and React (Vite, Axios, React Router) frontend.
- Implemented JWT-based authentication with registration, login, password reset token flow, and secure password change.
- Developed role-based access control for admin, librarian, and member, enforcing permissions across all APIs.
- Created MySQL-backed modules for books, membership plans, and members, including CRUD, plan assignment, and expiry calculation.
- Built book issue/return APIs with penalty calculation and borrowing history, plus React UI for catalog and core workflows.

Education

MLR Institute of Technology

Sep 2023 - Present

B.Tech in Computer Science & Engineering

Hyderabad, Telangana

- GPA: CPI: 7.5

Loyola Academy Junior College

Jun 2021 - Mar 2023

Intermediate (MPC: Physics, Chemistry, Mathematics)

- GPA: 93.2%

Resonance Info School, Khammam

Jun 2019 - Mar 2021

SSC (History, Biology, Maths, English, Hindi)

- GPA: 10.0

Skills

- **Programming Languages:** Python (Programming Language), Java, C++, JavaScript, HTML, Cascading Style Sheets (CSS)
- **Frameworks & Libraries:** React.js
- **Platforms & Automation:** ServiceNow, Enterprise platform, Digital workflow, Workflow Automation
- **Software Development:** Software Development, Full-Stack Development, Web Development, FULL STACK
- **Core Competencies:** Data Structures, Algorithms, Object-oriented Programming, Problem Solving, REST APIs
- **Tools & Technologies:**

Certifications

- **Creator Studio Delivery Accreditation**
- **Java Full Stack Developer Certification:** Completed a 6-month Java full stack training program focused on real-world, project-based development experience.
