

Biyyani Hari Venkata Gopal

Hyderabad, Telangana, India | +91-8555080191 | biyyanihari7@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Summary

B.Tech Computer Science student (2027) at MLR Institute of Technology with solid foundations in Java, Data Structures & Algorithms, and full-stack web development. Hands-on experience building and deploying production-ready applications - including a ride-sharing platform, an AI crop advisory system, and a library management system - with focus on clean architecture, RESTful API design, and scalable backend services. Holds ServiceNow CSA and CAD certifications and completed a virtual internship with Infosys Springboard. Open to internships and entry-level Software Engineer / Full Stack Developer roles.

Work Experience

Infosys Springboard | *Full Stack Java Developer Intern*

Feb 2026 - Apr 2026

- Built and deployed REST APIs using Java and Spring Boot, practising clean coding, modular design patterns, and version control with Git and GitHub.
- Implemented Core Java fundamentals - OOP, Collections, Exception Handling, JDBC - through hands-on labs and Java-based full-stack development projects.
- Strengthened debugging, unit testing, and code review skills while solving Java data structure and algorithm challenges.
- Worked with JavaScript and React.js frontend modules, strengthening full-stack integration and component-based development techniques.
- Delivered all milestones on schedule by collaborating in a virtual team environment, consistently writing clean, well-documented, and maintainable code.

Projects

ShareFare – Ride Sharing Platform | [ShareFare](#)

- Architected the entire backend using Java and Spring Boot, applying clean architecture and modular OOP design patterns from the ground up.
- Designed and implemented REST APIs for ride search, booking, route management, and real-time ride status updates, following best practices for API design and documentation.
- Implemented user authentication and session management with role-based access, securing all backend API endpoints.
- Deployed and hosted the application live at [sharefare.online](#), demonstrating end-to-end ownership from development to production.
- Applied OOP design patterns, SOLID principles, and Git-based feature-branch workflow with code reviews throughout development.

AgroSmart | [AgroSmart](#)

- Built an ML-powered crop recommendation engine using RandomForest, and a CNN/Keras-based leaf disease detection model that identifies plant diseases from uploaded leaf images.
- Designed and implemented REST APIs (/api/crop/predict, /api/fertilizer/recommend, /api/disease/predict) with SQLite history storage, OTP-based authentication, and an admin dashboard with role-based access control.
- Added fertilizer advisory with nutrient charts and multilingual support (English, Hindi, Telugu); deployed on Render with Gunicorn using modular Flask blueprints and SQLAlchemy ORM.

Sanjeevani – Blood Emergency Management Platform

- Built a full-stack blood donor-request matching platform using ServiceNow App Engine Studio, with 4 custom tables, 40+ custom fields, and a scalable data model for donor, request, response, and donation management.
- Implemented ACL-based role security, Business Rules for automated request validation and 90-day donor eligibility enforcement, and Script Includes for blood group compatibility matching.
- Designed event-driven workflows using Flow Designer with email notifications, escalation mechanisms, dashboards, and SLA-based reporting architecture.

Librario – Library Management System | [Librario](#)

- Developed REST APIs for books, members, and penalty calculations with JWT-based role access (admin/librarian/member) across all endpoints.
- Built end-to-end issue/return workflows with borrowing history, integrated with a React.js catalog frontend.

Skills

- Programming Languages:** Java, Python, JavaScript, C++, HTML, CSS
- Frameworks & Libraries:** Spring Boot, JPA/Hibernate, React.js, Node.js, Flask
- Backend & APIs:** REST APIs, Spring MVC, JDBC, Microservices
- Database:** MySQL, PostgreSQL
- Core Competencies:** Object-Oriented Programming, Data Structures & Algorithms, Problem Solving, Debugging, Clean Code
- Tools & Version Control:** Git, GitHub, Postman, IntelliJ IDEA, VS Code
- Platforms:** ServiceNow (App Engine Studio, Flow Designer, ACLs, Script Includes, Business Rules, GlideRecord)

Education

MLR Institute of Technology

B.Tech, Computer Science & Engineering | CGPA: 7.5

Sep 2023 - Present

Hyderabad, Telangana

Loyola Academy Junior College

Intermediate, MPC: Physics, Chemistry, Mathematics (GPA: 93.2%)

Jun 2021 - Mar 2023

Hyderabad, Telangana

Resonance Info School, Khammam

SSC, History, Biology, Maths, English, Hindi (GPA: 10.0)

Jun 2019 - Mar 2021

Khammam, Telangana

Certifications

- ServiceNow Certified Application Developer (CAD) - ServiceNow University
- ServiceNow Certified System Administrator (CSA) - ServiceNow University
- HackerRank Java (Basic) Certification: Passed HackerRank skill certification test in Core Java. Earned: Dec 2024 | ID: 6265795AACF0
- Java Full Stack Developer Certification: Achievers IT Institution-Completed 6-month Java full stack training covering Core Java, Spring Boot, OOP, REST APIs, and real-world project-based development.
- AI Fundamentals: Foundations for Understanding AI - IBM SkillsBuild | May 2026
